A Smile Designed Around You

A beautiful smile is about more than straight, white teeth. The shape, size, colour, alignment, and proportions of your teeth all contribute to the way your smile looks. Smile designing is a personalised approach to improving these features while considering your facial appearance, natural teeth, and individual preferences.

At Jerush Dentofacial & Cosmetic Laser Centre, smile designing focuses on identifying the changes that may help you achieve a balanced, natural-looking smile. Depending on your dental condition, treatment may involve one procedure or a combination of cosmetic and restorative dental treatments.

What Can Smile Designing Improve?

Smile designing may address several cosmetic concerns, depending on your teeth and gum health.

"C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\gaps-and-uneven-teeth.webp"

Gaps and Uneven Teeth

Selected gaps, irregular tooth edges, and minor alignment concerns may be improved with suitable restorative or orthodontic options.

"C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\tooth-color-and-staining.webp"

Tooth Colour and Staining

Professional whitening or other appropriate treatments may help improve the appearance of discoloured teeth.

"C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\tooth-shape-and-proportion.webp"

Tooth Shape and Proportion

Cosmetic bonding, veneers, or selected restorative treatments may help improve the shape, length, or proportions of certain teeth.

"C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\smile-gum-balance.webp"

Smile and Gum Balance

When appropriate, treatment planning may consider how the teeth and gum line appear together when smiling.

Your Smile Designing Journey

Smile design begins with understanding what you want to change and determining which options suit your oral health.

1. Understanding your goals: Discuss the features of your smile that you would like to improve.

   "C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\understanding-your-goals.webp"

2. Evaluating your dental health: The dentist examines your teeth, gums, bite, and existing restorations. The dentist may recommend photographs or X-rays when necessary.

   "C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\evaluating-dental-health.webp"

3. Planning suitable treatments: Available options are explained according to your dental condition, preferences and budget.

   "C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\planning-suitable-treatments.webp"

4. Reviewing the proposed smile: Digital simulations or mock-ups may be available in selected cases to help visualise possible changes. These are planning aids rather than guaranteed final results.

   "C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\reviewing-proposed-smile.webp"

5. Carrying out treatment: The agreed procedures are performed according to the treatment plan, followed by review and maintenance advice.

   "C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\carrying-out-treatment.webp"

Treatments That May Be Part of Smile Designing

Smile designing is not one fixed procedure. Your dentist may recommend one or more of the following, depending on your needs:

- Teeth whitening: To improve the colour of suitable natural teeth.

  "C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\teeth-whitening.webp"

- Composite bonding: To reshape selected teeth or repair minor chips and gaps.

  "C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\composite-bonding.webp"

- Dental veneers: Thin restorations designed to improve the appearance of the front surfaces of suitable teeth.

  "C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\dental-veneers.webp"

- Orthodontic treatment: Braces or clear aligners to address alignment and selected bite concerns.

  "C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\orthodontic-treatment.webp"

- Gum contouring: In selected cases, to improve the appearance of the gum line.

  "C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\gum-contouring.webp"

- Crowns or other restorations: When a tooth requires additional structural restoration as well as aesthetic improvement.

  "C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\crowns-other-restorations.webp"

Not everyone needs every treatment. Preserving healthy tooth structure and choosing procedures that suit your oral health are important parts of planning.

Maintaining Your New Smile

The longevity of cosmetic dental work depends on the treatment performed, your oral hygiene, and everyday habits.

- Brush twice daily with fluoride toothpaste and clean between your teeth.

  "C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\brush-twice-daily.webp"

- Attend regular dental check-ups and professional cleaning when recommended.

  "C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\dental-checkup.webp"

- Avoid biting hard objects or using your teeth to open packaging.

  "C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\avoid-biting-hard-objects.webp"

- Follow your dentist's advice if you grind or clench your teeth.

  "C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\follow-your-dentists-advice.webp"

- Maintain whitening or restorative treatments only as advised for your specific needs.

  "C:\Jerush-dentoface-new-site-react\public\images\medical-services\dental-care\cosmetic-dentistry\smile-designing\whitening-restorative-treatments.webp"

Some treatments, such as veneers and crowns, may require the removal of tooth structure and may need replacement in the future. Your dentist should explain the benefits, limitations, maintenance requirements, and alternatives before treatment begins.

Frequently Asked Questions

1. What is smile designing in dentistry?

Smile designing is a personalised treatment-planning approach that considers the appearance of your teeth, gums, and smile to identify suitable cosmetic or restorative options.

2. Is smile designing suitable for everyone?

Many people can explore cosmetic dental options, but the appropriate treatment depends on oral health, gum condition, bite, and individual goals. Existing dental problems may need attention first.

3. Does smile designing always involve veneers?

No. Some people may benefit from whitening, bonding, orthodontic treatment, or a combination of options. Veneers are only one possible treatment.

4. Can smile designing close gaps between teeth?

Depending on the size of the gaps and the underlying cause, options may include orthodontic treatment, composite bonding, or veneers. The dentist can explain which option is suitable.

5. How long does smile designing take?

The timeline depends on the procedures involved. Whitening or bonding may require relatively few visits, while orthodontic treatment or more complex restorative work may take longer.

6. Are smile designing results permanent?

No cosmetic treatment lasts indefinitely. Results vary by procedure, and restorations may require maintenance or replacement. Natural teeth and gums also need ongoing care.

7. Can I see my smile before treatment?

Digital simulations or trial smile mock-ups may be available for selected treatments. They can help communicate the proposed changes but cannot guarantee the exact final appearance.

Discover Your Smile Options at Jerush

Your smile should complement your natural features while supporting healthy teeth and gums. At Jerush Dentofacial & Cosmetic Laser Centre, a personalised consultation can help you understand the available options and choose an approach suited to your needs.
